CROP PRODUCTION IS COSTLY

It costs a bundle of money to produce a crop. Machinery, seed, fertilizer and chemical costs continue to increase, which means the producer has a lot at stake.

CROP PRODUCTION IS RISKY

Do not let a hailstorm cause financial stress. When a producer plants without protection, he/she is risking years of potential profits. Producers can have all of the right timing and inputs, but without the right coverage, they are still at risk.

CROP PROTECTION MAKES SENSE

All of the costs and the increased risks make it prudent to protect the producer's crops. Now producers can buy protection up to the full value of the crop, even when they have a high yield.

PROTECTION CONSIDERATIONS

Crop-Hail coverage is available up to the full value of the crop. Deductibles provide a variety of choices that permit the producer to partially self-insure for a reduced premium cost.

POLICY FEATURES*

- Hail Protection
- Fire Protection
- Fire Department Service Charge Coverage
- Transit Coverage
- Catastrophe Loss Award (most coverages)
- Replanting Coverage (most crops)
- Others

RISK MANAGEMENT

Crop-Hail coverage (up to the full value) can be the basis for the late season pre-harvest crop sales to maximize profits at a reduced risk.

Protection can be increased as bumper crop yields or higher prices become apparent. Crop-Hail coverage also covers the deductible portion of MPCl protection. MPCl and Crop-Hail coverages may both be eligible for payment on the same loss event.

MORE INFORMATION

These endorsements vary by state and by crop. See your local Rain and Hai agent for more information!

* Special endorsements may also be available. These features vary by state and by crop. See below for further details.

BENEFITS OF CROP-HAIL COVERAGE

- Protects profits
- Fosters greater grower confidence to do pre-harvest crop sales
- Protects crops up to the full value
- Acre-by-acre coverage provides protection from isolated damage
- May be used as loan collateral
- Rewards the more businesslike grower
- Discover how crop insurance can provide worry-free protection for the tough times

HOW IT WORKS

	\$250	Per acre of full coverage protection purchased
×	100	Acres insured/damaged
=	\$25,000	Guarantee
×	40%	Hail damage
=	\$10,000	Loss payment

ENDORSEMENT TYPE	COVERAGE
Companion Hail (CP)	Designed to cover, on an acre basis, the portion of the crop not insured under an MPCl policy identified as the difference between the potential yield and the yield guaranteed by the MPCl coverage. An underlying MPCl policy is required.
Cotton Wind (CW)	Provides coverage against direct loss to cotton caused by wind.
Cotton Module (CM)	Provides coverage against direct loss caused by fire for harvested cotton that is temporarily stored in the field until the cotton can be processed or ginned.
Wheat Wind (OW)	Provides coverage against direct loss to small grain crops in Kansas, Nebraska, Oklahoma and Texas caused by wind if accompanied by hail damage of 5% or more.
Reject Coverage (RC)	Provides coverage against direct loss due to hail damage that causes the crop to be rejected by the processor or buyer. The underlying Crop-Hail policy will cover the direct damage caused by hail and this endorsement will cover the additional loss in value from rejection of the crop.
Tobacco Wind (with set up) (SU)	Provides coverage against wind damage that causes the breaking off of stalks or destruction and/or removal of leaves from the plant.
Tobacco Theft (TT)	Provides coverage against direct loss to tobacco caused by theft and vandalism.
Green Snap or Wind (Green Snap and/or Lodging) Coverage for Field Corn, Seed Corn and Sweet Corn (WE)	Provides coverage against direct loss due to Green Snap or Lodging caused by natural wind to field corn, seed corn or sweet corn. Coverage options include Green Snap coverage, wind (Green Snap and/or Lodging) coverage or extra harvest expense coverage.
Cotton Escalator Buy-Out Option	Removes the cotton escalator provision and provides you 100% of the limit of insurance at the time coverage incepts.
Replant Exclusion for Corn, Seed Corn and/or Soybeans	Excludes replanting coverage from the underlying Crop-Hail policy for a reduction in the premium rate.
Seed Corn Endorsement	Provides coverage against lack of pollination due to direct loss from hail. It also covers direct loss to the ears and indirect loss to leaves, stalks or tassels from hail damage that affects the production of commercially acceptable seed corn.
Crop-Hail Production Plan (CHPP)	Covers, on a unit basis, the portion of the crop not insured under a Yield Protection (YP) or Revenue Protection (RP) plan of insurance.
Corn and Soybean Replant Endorsement (RG)	Coverage is provided for causes of loss other than hail that damages the corn or soybeans to the extent that they need to be replanted.
Winter Wheat Replant Endorsement (WW)	Provides coverage to winter wheat damaged by freeze and/or snow mold to the extent that replanting is necessary.
